For more information, see the Adobe World-Ready Paragraph Composer user documentation. -home intervention has been recommended to improve one's recovery from back pain ([@B24]). On the other hand, Smith et al. showed in their randomized trial that implementing a high dose of PEPA during labor significantly increases the duration of labor ([@B25]). In the current study, the mean PEPA score was higher than that in the above-mentioned study. It is reasonable to assume that this is because the subjects of the study by Smith et al. were informed about the possibility of high-dose PEPA prior to the start of labor. Their subjects f678ea9f9e
